Cijela godina

**PLACE AND TIME OF
DEPARTURE**

Sinj

PLACE AND TIME OF ARRIVAL

Sinj

DESCRIPTION:

This amazing experience will introduce you to the spring of the Cetina river.

The spring is located near the town of Vrlika, on the northeastern side of the artificial lake Peruća.

The flight lasts about 45 minutes, starting from the Sinj airport and flying over the beautiful and proud city of Sinj. In the middle of the town, there is small hill with middle age cannon on it that fire during the knight competition called Alka. A unique tradition as a memory of brave period in history when citizens were fighting against Osman empire.

The flight continues above the artificial lake Peruća and continues to the northeast in the direction od Dinara, the highest mountain in Croatia. A few minutes after flying over the end of the lake, you will see a nice little lake surrounded by fields and an old village. It doesn't look like anything special, but when you came over it, you will notice that under the nice and flat surface of the water, you can't see the bottom of that small lake, just dark abyss that looks really magical.

During some combination of weather conditions, blue skies and a few clouds above, the view of this unique natural phenomenon can be reminiscent of the human eye.

After several steep turns above the spring, the flight continues over the southern side of the Vrlika field. After overflying the Peruća dam, the plane will follow Cetina river inbound airport for landing.
